

Whether you are a graphic designer, digital photographer, or a Web user with files to share, large file formats are more and more common. As file sizes increase, previous methods of file exchange have become more costly, cumbersome, and less reliable.

Until now, large file delivery has relied upon limited technologies such as FTP servers, e-mail, and over-night delivery service. (See *Table to Right*).

YouLoad provides a more comprehensive, full-featured solution that makes it easy to get the files you need when you need them. YouLoad bridges the gap between huge file delivery and success!

The YouLoad Advantage

	YOULOAD	EMAIL	FTP	PRIORITY MAIL
